Residence *Langing*
 Education *Read & write*
 Weight *98 3/4 lb*
 No. of Children *-1-*

HISTORY.

CAUSATION
 Predisposing
 Exciting
 Hereditary

DURATION
5 Days

About 5 days ago without any known reason she became restless and unable to perform her duties indifferently and talked somewhat stupidly. She has since become much more listless and for the last two days has been very restless, unable to do any work, and so stupid that she has been delirious, and ceased to refuse to speak or take any notice when spoken to. Stiffness of her body and limbs will not walk or move and has therefore to be carried from place to place. She refuses her food and will bring food. She is sleepless at night, but has not yet been bitten dirty or destructive. There is every reason to believe that drink is the cause of the attack.

ON ADMISSION
 Mind *Refuses to speak and disobeys what is said to her. There was great stiffness of limbs & body. She*
Hardly *refuses to smelt & excites being carried.*
 Body *will be moved and she is apparently free from any organic disease.*

Was in a very excited state when admitted, throwing herself about, stiffening limbs and body, would not speak and took no notice whatever when spoken to & refused to say a word, she resisted forcibly, attempts made to dress her so was put to bed. When she lay quiet, but would not take anything or speak and when treated stiffened her limbs in the most peculiar way. During the night she was quiet but did not sleep at all. To day she has remained in bed, and seems rather more rational but she will not speak she has however taken a small quantity of nourishment.

17th Aft better last night but continues in the same stupid state and remains in bed away from treatment.

18th Aft well last night and this morning when treated she answered questions and spoke fairly rationally. She is quiet and has taken her meals well but she has a stupid-confused look and is unable to employ herself, but she assisted herself in dressing.

19th Aft well last night and this morning she dressed herself took her breakfast and made herself useful washing up. She speaks when spoken to and apparently conducts herself rationally.

21st Now sleeps well, talks sensibly, takes all her meals and makes herself useful sewing, & cleaning.

22nd She now seems rational in every way and is regularly employed in the kitchen where she makes herself very useful.

23rd Continues to be usefully employed in the kitchen and her mental condition is now very satisfactory she suffers however from neurosthenia and for this she is at present under treatment.

24th Her mental condition continues satisfactory she is fully employed in the kitchen and since she has been under treatment suffers less from neurosthenia.

Sept. 26^r

1882

Should she continue as she now is her dis-
will be granted to her at the end of the
Her condition being in every way satisfactory
she has to-day been discharged as

Elizabeth Fox Capt's from Sol. 628
The nuptials herself to some extent but she is still
griefful, "troubled" and rather depressed but she
naturally takes all her meals & sleeps well
not quite so depressed, but she is rather childish in
state which is however said to be natural to her.
nuptials herself sewing, and sleeps without medicine
she finds to be allowed to go home and daily
where she will be allowed to go.

February 7^r

20^r

Rather more cheerful than she was, but rather child-
she is however no particular trouble, she takes all
meals sleeps well, and nuptials herself to some extent
she is nervous and griefful and continually
that she may be allowed to go home. She sleeps
will take all her meals and nuptials herself at
-work. She is naturally a woman of both
and physical weakness and her present state is
said by her husband to be natural to her. He
is very anxious to have her at home so permission

has been granted him to apply for his wife at the
next Committee meeting
At the Committee meeting held to-day she was applied
for and allowed out in consequence upon two
months trial.

Wright 20^r

A satisfactory medical certificate
having been received she has to-day
been discharged as recovered.
